DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims **21-22** are rejected under 35 U.S.C. 102(b) as being anticipated by Bessho, U.S. **5,893,025**.

Considering claim **21**, Bessho et al. discloses cable tv converter for receiving both analog and digital signals. Fig.1 illustrates the receiver comprising a mixer 10 (corresponding to the claimed mixer) coupled to a filter 8 (corresponding to the first filter for providing the mixer with a filter IF signal comprising a selected channel and residues of upper and lower adjacent channels; an oscillator 9 (which corresponds to the claimed oscillator), and filter 13 (corresponding to a second filter). The filter 13 attenuates approximately equal frequency to an audio carrier of an upper adjacent channel and approximately equal frequency to a video carrier of a lower adjacent channel. Thus, Bessho discloses all claimed subject matter.

Regarding claim **22**, see rejection of claim 21 above.

Allowable Subject Matter

3. Claims **1-20** are allowable over the prior art.
